*Growing Safe: Rooted in God's Word*, is a curriculum to help at-risk children and is produced by ASAP Ministries, Inc. We love to help children who have been through sad and difficult experiences. Abuse, slavery, and prostitution are real problems in many places throughout the world. God longs to help these children feel His love and their value and experience His protection. He wants to raise them to be confident enough to stand up to dangerous situations and make good choices.

There are three parts to this curriculum. The *Teacher's Workbook* has detailed instruction for teaching each lesson. A *Student Journal* helps the children internalize what they are learning and be able to process their own healing experiences. Two *Flipcharts* have illustrations of Bible stories and application stories that have been chosen to help children implement character qualities and to help identify and relate to similar experiences of how others have found hope and healing.

If you are interested in ordering additional copies of this flipchart, or other elements of the *Growing Safe: Rooted in God's Love* curriculum, please email ASAP Ministries at [office@asapministries.org](mailto:office@asapministries.org) or order them directly from [www.asapministries.org](http://www.asapministries.org).
